Subject: Flaming Gorge Notification - January 25, 2013
Date: Friday, January 25, 2013 2:36:39 PM
Attachments: [FG 2013-01-25.pdf](#)

Hello:

Flaming Gorge Dam will be undergoing maintenance and testing during the week of January 28, 2013, from Tuesday, January 29 through Friday, February 1. There will be times during the day when releases are up to twice the currently-scheduled release volume. Reclamation maintains flexibility of operations and releases during this testing in order to assist the testing crews and hydropower scheduling. Releases will return to the double-peak pattern in the attached document beginning Saturday, February 2, 2013.

Please note: this notification supersedes all previously-issued notifications and is current until a new directive is issued. All times identified in this directive are local time (Mountain Prevailing Time) and not hour ending.

Flaming Gorge information for the last five days is below. Please be aware that all data is provisional and subject to change.

Flaming Gorge	Elev (ft)	Inflow (cfs)	Unreg Inflow (cfs)
01/20/13	6,020.19	854	403
01/21/13	6,020.17	854	348
01/22/13	6,020.15	854	350
01/23/13	6,020.14	1,039	567
01/24/13	6,020.13	1,048	550

Additional FG data and information can be found here: http://www.usbr.gov/uc/water/rsvrs/ops/crsp_40_fgd.html
