Hello:

Releases from Flaming Gorge Dam are currently 1,700 cfs. Releases during the base flow season through September 30, 2016, will be modified regularly to provide for Colorado Pikeminnow flows in Reach 2 of the Green River. Targeted flow levels in Reach 2 will vary between approximately 2,000 cfs to 2,400 cfs. Yampa River flows are decreasing and it is prudent to increase releases to maintain targeted flow levels.

Therefore, Flaming Gorge releases shall be increased to 1,800 cfs beginning Tuesday, August 2, 2016, according to the attached schedule. Releases may be increased or decreased further depending upon Yampa River flows and an updated directive shall be distributed.

This notification is current until a new notification is issued and all times identified in this notification directive are in local time (Mountain Prevailing Time) and not hour ending.

Flaming Gorge information for the last five days can be found below. All data is provisional and subject to change.
